#### APPLIED MOLDING

Applied molding door styles have decorative molding accenting the perimeter of the center panel. The applied molding door style options available from Showplace come in various rail and stile widths, flat, flat reverse-raised solid center panels, and raised solid center panels.

Heritage SQ shown in Cherry Sienna

#### BEADED PANEL

Beaded panel features evenly-spaced, vertical beading on the flat center panel.

Summit shown in White

#### FLAT PANEL

The **flat panel** family of door styles contains a flat center panel. The flat panel options available from Showplace come in various rail and stile widths and flat and flat reverseraised solid center panels.

Breckenridge shown in Red Oak Amber

#### KERF PANEL

**Kerf panel** styles feature evenly-spaced, shallow kerf cuts on the flat center panel.

Tucson shown in Rustic Hickory Thunder

#### LOUVERED

Louvered refers to a style featuring narrow slats, positioned horizontally at a slight angle, in a fixed, consistent interval, resembling window blinds or shutters.

Cabana shown in Cherry Thunder

#### **METAL FRAME**

Choose between Aluminum, Stainless Steel and Bronze frames with glass options to fit your needs.

1919 shown in Aluminum with SoftEtch Low Iron

#### SLAB

Slab doors use a highly-stable engineered wood core, faced with wood veneers, acrylics, foils or textures. This promises ongoing dimensional stability.

Vienna shown in Bamboo Natural

#### MITERED

Mitered refers to how the rails and stiles of the door meet at the corners. Mitered joinery is at a 45-degree angle. The mitered options available from Showplace come in various rail and stile widths, flat, flat reverse-raised solid center panels and raised solid center panels.

Vercelli shown in Rustic Alder Rockport

### **3-PIECE**

**3-piece construction** consists of three components: two stiles (vertical components) and one center panel.

Villa shown in Textured Melamine Gibraltar

#### RAISED PANEL

Raised panel door styles have a raised solid center panel. The raised panel options available from Showplace come in various rail and stile widths and various raised center panel styles and edge treatments.

Channing shown in Maple Rockport

#### 5-PIECE

**5-piece construction** is made up of five components: two stiles (vertical components), two rails (horizontal components), and one center panel.

Chalet shown in Textured Melamine Burlap

### **WOODS AND SURFACES**

After selecting the perfect door style for your home, your choice of wood species, or surface, and finish follows. Each hardwood species offers a wide range of stains, paints, and specialty finish options, shown on the following pages. In addition to standard and specialty wood species, we also offer a variety of slab, 3-piece, and 5-piece door styles offering their own distinct range of surface options including veneers, acrylics, foils, and textures, shown on pages 38 and 39.

Door Style: **Pendleton** | Species: **Maple** | Finish: **Cashew** 

Door Style: Horizon | Species: Maple SG | Finish: Rockport

Door Style: Vienna | Finish: High-Gloss Acrylic Wired Mercury
Island Style: Milan | Species: Paint Grade | Finish: Gauntlet Gray
Designed by Eclectic Interiors in Memphis, TN.

### **WOOD SPECIES**

#### **CHERRY**

The warm elegance of Cherry darkens considerably as it ages. Cherry's fine grain often exhibits swirls and a flowing, random pattern. Its color varies from nearly white to dark reddish brown.

Pendleton II shown in Cherry Chesnut

### **HICKORY**

The outgoing extrovert of the hardwood family—dense, heavy Hickory displays vibrant grain patterns and wide variation in color. Lighter stains make this feature most evident, while darker stains tend to mute it.

Concord shown in Hickory Tawny

\*Hickory is also available in Rustic in Showplace and Inset framed and EVO.

#### **MAPLE**

The fine, uniform grain pattern of Maple tends toward lighter colorations. Like all woods, it will darken with age, but to a lesser degree than Cherry. Maple takes on a subtle mottled appearance when finished in darker stains.

Hillcrest shown in Maple Natural

#### PAINT GRADE

One of our most popular selections is Paint Grade. Choose any color from our standard paints or pick a custom color. Paint Grade doors and five-piece drawer headers have a solid, fine-grain hardwood frame. Center panels and slab headers are of HDM. HDM, an engineered wood, is used by cabinetry manufacturers of all quality levels because it is more stable than solid hardwood. The entire door is HDM in select door styles, if even greater stability is desired.

Chesapeake shown in Gauntlet Gray

#### **QUARTERSAWN WHITE OAK**

The more costly quartersawing method yields material with distinctive grain and superior stability. Quartersawn White Oak is also very receptive to glazing, highlighting its unique grain. We use genuine Quartersawn White Oak for face frames, end panels, and coordinating elements like moldings on all Quartersawn cabinetry orders.

Pendleton shown in Quartersawn White Oak Dusk

#### **RUSTIC ALDER**

Create an environment of authentic warmth and homey charm with Rustic Alder. Featuring Cherry-like grain, Rustic Alder displays visible knots, mineral streaks, and color variation in the door frames and solid center panels.

Savannah shown in Rustic Alder Vintage Natural

#### **RED OAK**

A time-honored favorite with prominent, distinctive grain character, Red Oak may show tiny rays and flowing patterns. It tends toward warm tones and is very hard with a high shock resistance.

Breckenridge shown in Red Oak Amber

SERU

### WALNUT

Walnut has a variable grain, ranging from straight to highly-figured, and color, ranging from tan to dark brown to purplish-gray heartwood, and creamy white to blonde sapwood. A darker stain is recommended when less color variation is desired.

Concord shown in Walnut Natural

### SURFACE OPTIONS E

Some door styles are offered in additional surface options like wood veneers, acrylics, foils and textures. These options expand our offerings to provide a unique look and feel. To really appreciate the diversity of these offerings, review actual samples at your Showplace dealer.

### FINISH IN STYLE

Our selection of stains, paints, and specialty finish options is extensive, providing unlimited customization opportunities. A quality finish is more than meets the eye. With Showplace, your finish selection offers superior durability, backed by limited lifetime-warranty quality.

Work with your Showplace designer to review samples and receive guidance.

### STANDARD STAINS

Let the natural beauty of your cabinets shine through with one of our many stains, custom-formulated for Showplace Cabinetry. Available at no extra charge, standard Showplace stains highlight the unique charm of each wood species and keep your cabinetry looking fresh for years to come.

With Showplace, your stain choices range in variations of color from light to dark. Enjoy the natural variability of your selected wood species with our lightest options. Whereas, some of our darkest selections may naturally mute some of the hardwood variability, offering a rich, more uniform look. The choice is yours! And since exceptional stained finishes start with how the wood is prepared, our sanding processes blend precise state-of-the-art sanding equipment with the personal attention of hand-sanding for a quality finish you can rely on.

All finishes, stain and paint, are offered in your choice of satin or matte sheen.

Door Style: Aria | Species: Hickory | Finish: Montana

### **CHARACTER STAINS**

Some stains mute variations in wood—the darker the stain, the more variation is hidden. Character stains provide a rich, semi-translucent look that accentuates the grain and variation found in natural wood. Try it with one of our Showplace specialty woods to make your eye-catching cabinetry all the more noticeable.

### **PAINTS**

Showplace painted finishes give the impression of a solid-color surface, but with our lifetime-warranty quality. Our multi-step process includes a final topcoat with an oven-baked varnish for superior durability.

Paints can be accented with no-charge, hand-wiped glazing or hand distressing on non-slab styles. Paints can also be specified in the Vintage, Brushed Vintage, and Subtle Vintage finish packages.

### **PAINTS**

# SHOWPLACE COLORSELECT \$ E

The ColorSelect option gives you the ability to choose your exact hue from the Sherwin-Williams fan deck, with more than a thousand choices. This allows you to coordinate your cabinetry with other painted elements in the home. Talk to your Showplace dealer for full details.

### ColorSelect CUSTOM \$

Have your heart set on a specific paint color from another paint brand? Not a problem with Showplace ColorSelect Custom. Create cabinetry in any paint color, from a suitable swatch or chip. Some limitations apply, so talk to your Showplace dealer about this special offering.

Available in Showplace Overlay and Inset lines.

Color representations are approximate. Please base selection decisions on actual samples.

### DISTRESSING \$ E R

Showplace distressing gives an aged, timeworn look to cabinetry, reminiscent of antique furniture. The process creates soft corners and profiles, and subtle, randomly-placed dents. Optional glazing accentuates these features even more.

#### **DISTRESSING OPTIONS**

#### STAINED DOORS

- Rub-through, Dents & Oversanding

### HANDCRAFTED GLAZING \$ E R

Glazing is an additional finish step in which a pigmented material is applied to the surfaces, then hand-wiped partially away. This allows the glazing to "hangup" in areas of detail, adding contrast and depth. Because of the handcrafted nature of glazing, it is naturally variable.

Showplace glazing is offered at no additional charge in these six tones. Glazing is available on most non-slab door styles, woods, stains and paints, in satin or matte sheen.

### WEATHERED COMBINATIONS

50 | SPECIALTY FINISHES

# VINTAGE FINISHES SER

The unique Showplace Vintage offering takes antique character to the highest level. Special Vintage finish techniques include hand padding and dry brushing to create a distinctive impression of elegant aging.

Optional Vintage character elements are achieved through chain distressing with a proprietary Showplace technique, worm holing and worm tracking, chisel and rasp distressing, and over-sanding. This beautiful, handcrafted finish is offered in three variations, some without distressing, on a wide selection of woods, in both stains and paints, in your choice of satin or matte sheen. We invite you to view actual samples at your Showplace dealer.

### **CUSTOM-BUILT STANDARD** FEATURES.

At Showplace, we've made the most important features standard. For increased storage capacity and convenience, we offer wall cabinets at 13" deep and base cabinets with a  $5\frac{1}{2}$ " top-drawer opening height.

For superior strength, our drawers are 5%" solid hardwood, 4-sided, dovetailed, with a captive bottom. And our cabinet box end panels are ½" plywood.

Blum soft-closing full-extension drawer glides and 6-way adjustable hinges are the industry's best, rugged enough for decades of daily use.

We'll show you the difference.

### **OUR BRANDS**

Showplace started in 2000 as a small semi-custom cabinetry brand producing 50 cabinets per day out of Harrisburg, SD. Today, we have over 1,200 dealers across the United States and make upwards of 800 cabinets per day. You can count on our 650+ employee-owners to produce quality cabinets across four different product lines.

Our flagship line started it all in 2000 and, to this day, is our most popular line. Cabinets are made of quality materials and provide plenty of options for customization. We consider this our most diverse product line, allowing you to make selections in line with your budget, big or small.

Meet the newest addition to our lineup, added in 2020. Featuring only our most popular finish options and limited customization, Longview is a great fit for simple kitchens, bathrooms and laundry rooms where custom designs aren't always needed. Longview provides the opportunity to get Showplace quality and the unique finishes and door styles you deserve, at a more affordable price point.

In 2016, we added EVO to our lineup. EVO is frameless cabinetry, also known as European-style cabinetry. Depending on your design preferences and, ultimately, the selections you make, EVO may be a more budget-friendly option than our flagship line. Contemporary styles are popular in EVO, but with our range of door styles and finish options, you can truly create any style from traditional to contemporary.

For over 10 years, we've been refreshing cabinets with our refacing line, Renew. Refacing is a great option for remodel projects when you plan to keep your existing layout and cabinet boxes, but are looking for an updated look and feel. Get new doors, hinges and veneers in Showplace door styles and finish options, including specialty finishes. Not all projects are a great fit for Renew, but when it works, you can expect a more budget-friendly option than all-new cabinetry.
